Status of the Claims / Priority

Claims 1, 3-11 and 13-31 are pending in the current application. According to the *Amendments to the Claims*, filed June 28, 2010, claims 1, 3, 8, 9, 11, 14 and 30 were amended and claims 2 and 12 were cancelled. This application is a 35 U.S.C. § 371 National Stage Filing of International Application No. PCT/EP2003/013994, filed December 9, 2003, which claims priority under 35 U.S.C. § 119(a-d) to DE 102618526, filed December 20, 2002.

Applicant's affirmation of the following election, with traverse, in the reply filed on

salt of formula I - p. 23, example vii.

The requirement was made FINAL in the *Non-Final Rejection*, mailed on April 10, 2009.

Claims 15-29 and 31 were withdrawn from further consideration, pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

The sections of U.S.C. Title 35 that formed the basis of prior rejections formulated, as well as any references supporting said rejections, that are not included with this Office action, may be found in either the *Non-Final Rejection*, mailed on April 10, 2009, or the *Final Rejection*, mailed on October 27, 2009. Furthermore, any rejections and/or objections of record not explicitly addressed herein below, are hereby withdrawn, in light of applicant's arguments and/or the *Amendments to the Claims*, filed June 28, 2010.

Thus, a third Office action and prosecution on the merits of claims 1, 3-11, 13, 14 and 30 is contained within.

New Claim Objections

Claim 1 is objected to because of the following informalities: ***general chemical formulae*** should be replaced with *chemical formulae*; b) *with the proviso that they do not represent a single bond* should be omitted, with respect to R^5 , $R^{5'}$ and $R^{5''}$; and c) *hydroxyl* should be replaced with *hydroxy*, with respect to R^2 , $R^{2'}$, $R^{2''}$, R^3 , $R^{3'}$, $R^{3''}$, R^7 , $R^{7'}$, $R^{7''}$, R^8 , $R^{8'}$ and $R^{8''}$. Appropriate correction is required.

Claim 6 is objected to because of the following informalities: ***an alkylated amine*** should be replaced with ***a lower alkylated amine*** to avoid issues under 35 U.S.C. § 112, second paragraph. Appropriate correction is required.

Claim 7 is objected to because of the following informalities: *alkylated amine* should be

replaced with ***lower alkylated amine*** to avoid issues under 35 U.S.C. § 112, second paragraph. Appropriate correction is required.

Claim 8 is objected to because of the following informalities: ***an phenyl group*** should be replaced with *phenyl*. Appropriate correction is required.

Claims 8 and 9 are independently objected to because of the following informalities: the claims are substantially duplicative, since they are so close in content that they both cover the same thing, despite a slight difference in wording. Moreover, claim 9 fails to further limit claim 8. Appropriate correction is required. See 37 CFR 1.75 and MPEP § 706.03(k).

The examiner suggests cancelling claim 9, to overcome this objection.

Claims 3-5, 10, 13 and 30 are independently objected to because of the following informalities: the claims are dependent upon an objected base claim. Appropriate correction is required.

Claim Rejections - 35 U.S.C. § 112, Second Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 recites the limitation *the mixture of oligomeric phenazinium compounds*

according to claim 1, wherein the monomeric units in the compounds are selected from the group consisting of: in lines 1-3 of the claim. There is insufficient antecedent basis, in claim 1, for this limitation, with respect to 7-*N*-methylamino-2-

methyl-5-phenyl-5,10-dihydrophenazine, shown to the left above, and 2-*N,N*-dimethylamino-10-phenyl-5,10-dihydrophenazine, shown to the right. According to claim 1, at least one of the residues selected from the group consisting of R^2 , $R^{2'}$, $R^{2''}$, R^3 , $R^{3'}$, $R^{3''}$, R^7 , $R^{7'}$, $R^{7''}$, R^8 , $R^{8'}$ and $R^{8''}$ must be either halogen or hydroxy, with respect to the substituted phenazinium salts of the formula <I> or formula <II>.

The examiner suggests omitting 7-*N*-methylamino-2-methyl-5-phenyl-5,10-dihydrophenazine and 2-*N,N*-dimethylamino-10-phenyl-5,10-dihydrophenazine, to overcome this rejection.

Claim 14 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the limitation *the mixture of oligomeric phenazinium compounds according to claim 1, selected from the group consisting of:* in lines 1-2 of the claim. There is insufficient antecedent basis, in claim 1, for this limitation, with respect to the following substituted phenazinium salts of the formula <I> or formula <II>:

Art Unit: 1624

8,8'-bis-(*N,N*-dimethylamino)-3-3'-dimethyl-10,10'-diphenyl-[2,2']biphenazinyl-10,10'-ium tetrafluoroborate;

8,8'-bis-(*N,N*-dimethylamino)-10,10'-diphenyl-3-methyl-[2,2']biphenazinyl-10,10'-ium tetrafluoroborate;

3,8',8''-tris-(*N,N*-dimethylamino)-8-methyl-5,10',10''-triphenyl-[2,2';7',2'']terphenazine-5,10',10''-ium tetrafluoroborate;

8'-bis-(*N,N*-diethylamino)-8-*N,N*-dimethylamino-3-methyl-10,10'-diphenyl-[2,2']biphenazinyl-10,10'-ium sulfate;

8,8'-bis-(*N,N*-dimethylamino)-10,10'-dimethyl-[2,2']biphenazinyl-10,10'-ium hydrogen sulfate;

8,3',3''-tris-(*N,N*-dimethylamino)-8-methyl-5,10',10''-triphenyl-[2,2';7',2'']terphenazine-5,10',10''-ium tetrafluoroborate; and

8,8'-bis-(*N,N*-dimethylamino)-10,10'-diphenyl-[2,2']biphenazinyl-10,10'-ium tetrafluoroborate.

According to claim 1, at least one of the residues selected from the group consisting of R^2 , $R^{2'}$, $R^{2''}$, R^3 , $R^{3'}$, $R^{3''}$, R^7 , $R^{7'}$, $R^{7''}$, R^8 , $R^{8'}$ and $R^{8''}$ must be either halogen or hydroxy, with respect to the substituted phenazinium salts of the formula <I> or formula <II>.

The examiner suggests omitting the aforementioned species, to overcome this rejection.

Allowable Subject Matter

No claims are allowed.
